## BLAME TRAIN

Deborah Minter

With a vocal style full of dreamy laidback imagery, newcomer MICK WILSON and his brand new debut CD Blame Train have just about nailed the emotionally and environmentally aware 'green' country/folk genre. Mick has written all but one track on the album – that track, Sweet Home Alabama is an interesting, less hard-edged version. Opening track Headspace almost brings the aroma of the beach. Black Dog is a disturbing, yet positive look at beating depression. Justy is an unabashed love song dedicated to his wife – and the one reason he began writing and playing music. Blame Train has a message for excuse-mongers to stop blaming others. Debut single Run Piggy Run is a true tale of a professional pig shooter Trace Cronin – a very catchy track – not quite 'politically correct' but hey, I've seen the damage wild pigs cause. It will be a big hit with regional Australia. This is a really honest album.
